

# Lifting the fog of cloud-based live-streaming video conferencing for Teachers

zoom

[BobbieGrennier.com](http://BobbieGrennier.com)

# ZOOM Illuminated

## Scheduling the Meeting:

1. Enable *waiting room*.
2. Turn on *mute participants upon entry*.
3. Require a meeting password.
4. Turn on *host video*.
5. Turn off *participants video*.
6. Turn off *private chat*.
7. Turn off *screen sharing*.
8. Enable *breakout rooms*.

# ZOOM Control Room

Mute controls audio. Mute students upon entry.

You can manually invite students by emailing them the join link to your ZOOM session.

Controls the video/audio of all students. Click *More* to see setting options.

Shares your screen. *Custom* lets you share just a tab and not the whole screen.

Turn your video on and off.

Record your session to your computer.

Students can text you during muted time. “...” controls chatroom.

Enable if you want to group students for breakout work.

## Teacher Tip

Students also have a ***raise hand*** feature. If they click it, you will see a hand in the corner of their video window. I have students use the *raise hand* button, or actually raise their hand so I can see them, or type the word hand in the chat window. Once I see it, I give them permission to unmute to ask their questions. When done, they mute themselves again.

Hope this helps!
